

**H1 2026: consolidated revenue up 6.5%
at current exchange rates to €696.0m**

11.5% up at current exchange rates

In the first half of 2026, VIEL & Cie continued the growth momentum observed in previous years.

The Group reported first-half consolidated revenue from its operating subsidiaries of €696.0m, against €653.5m in the same period last year, an increase of 6.5% at current exchange rates. At constant exchange rates, consolidated revenue grew 11.5% to €728.8m. The movement in currency exchange rates has a significant impact at the start of the year on the conversion into euros of the Group's international activities.

In the second quarter, consolidated revenue was €331.2, compared with €323.2m in 2025, an increase of 2.5% at current exchange rates. At constant exchange rates, revenue was up by 4.4%. The second quarter of 2026 was negatively impacted by an unfavourable base effect resulting from strong activity in April 2025 amid changes in U.S. customs duties.

There has been no significant change in the Group's financial situation since the publication of its 2025 financial statements.

**The variations in income statement items at current exchange rates are calculated, based on average rates for the period compared with average rates for the previous period when translating the currencies of the Group's consolidated subsidiaries. The variations in income statement items at constant exchange rates are calculated using the average exchange rates for the period N-1 over both comparison periods.*
